## The Paradox of \$1 Million

Once when my daughter was 13 years old, she asked me how much our house cost. I responded, â€œIâ $€^{T M} m$ not going to tell you.â€ $\bullet$

Daughter: â€œWhy not?â€•
 understand.ấ•

Daughter: â€œYes, I will. Tell me.â€•
Me: â€œOk. We paid $\$ 20,000$ for it.â€ $\bullet$ (Our house cost way more than $\$ 20 \mathrm{k}$. )
Daughter: â€œWow, thatâ $€^{T M}$ s a lot. Are we rich?â $€_{\bullet}$
Itâ $€^{T M}$ s a funny story, and I chuckle when I think back on it. It seared on my mind how hard it can be to have a handle on the value of money until youâ $\epsilon^{\mathrm{TM}}$ re out in the world, making your own money and paying your own bills.

Helping younger generations understand the value of money is essential. Best practices include getting an allowance for chores, having a summer job, and bearing the responsibility for certain expenses.

A helpful exercise for young people from wealthy families is to work through the â€œparadox of a million dollars.â€ •

## Saving \$1 Million is Hard

On the one hand, $\$ 1$ million is a vast sum of money. According to the New York Times, having $\$ 1$ million puts you in nearly the $90^{\text {th }}$ percentile of household wealth in the U.S. (the $50^{\text {th }}$ percentile is $\$ 127,000$ ).

Itâ $€^{\mathrm{TM}_{s}}$ not surprising that most people donâ $€^{\mathrm{TM} t}$ have $\$ 1$ million because unless you make a ton of money, it is tough to save that much. I can best illustrate this with an example. Assume Greg graduates from college at 22 and gets a job with a starting salary of $\$ 50,000$, translating into a takehome pay of $\$ 38,000$ or $\$ 3,166$ per month. Greg has always been a big saver, so he scrimps on luxuries and, with a bit of help from his parents, can sock away $\$ 1,000$ per month, which he invests prudently. If he averages a $7 \%$ return on his investments, it will take him 27 years, saving $\$ 1,000$ per month, to accumulate $\$ 1$ million.

## Having \$1 Million Doesnâ€ ${ }^{\text {TM }}$ t Make You Rich

## ST. LOUIS TRUST

\&t Family Office

Yes, $\$ 1$ million is a lot of money, and I think weâ $\epsilon^{T M} \mathrm{~d}$ all choose to have $\$ 1$ million versus not. Yet, on its own, it doesnâ $€^{\mathrm{TM}} \mathrm{t}$ make you rich. Using Greg as an example again, letâ $€^{\mathrm{TM}_{S}}$ assume that when he turned 22 , he inherited a cool million, decided not to take a job, and just live off the money.

If we use the general rule of thumb that $4 \%$ is a safe withdrawal rate to preserve the real value of a portfolio, Greg will get $\$ 40,000$ per year. Thatâ $€^{T M_{S}}$ right about his take-home pay from a job paying $\$ 50,000$ per year. Which is great. But itâ $€^{T M}$ s not enough to afford a big house, send his kids to private school, or take luxury vacations. Itâ $€^{\mathrm{TM}}$ S less than the median U.S. household makes (which was $\$ 67,521$ in 2020, according to the Census Bureau). Itâ $€^{T M}$ S enough to fund a modest lifestyle at best.

We can draw similar conclusions from larger sums of money â€" $\$ 2$ million produces about $\$ 80 \mathrm{k}$ of portfolio withdrawals and $\$ 3$ million $\$ 120 \mathrm{k} \hat{\text { â" }}$ " amounts that are solidly middle class but hardly get you on Lifestyles of the Rich and Famous.

Of course, Greg would be best off if he took his $\$ 1$ million inheritance, invested it wisely, and took the job paying $\$ 50,000$. If he could live mostly off his salary and let the $\$ 1$ million grow, it would be worth $\$ 2$ million in his 30 s , $\$ 4$ million in his 40 s, and $\$ 8$ million in his 50 s. It will be worth even more if he adds his savings to it.

## The Lesson

Learning that $\$ 1$ million is a huge amount of money yet canâ $\ell^{\mathrm{TM} t}$ fund a luxurious lifestyle is usually revelatory for young family members. This knowledge helps them put wealth in perspective and set expectations for their financial futures.

St. Louis Trust \& Family Office is an independent, multi-family office and trust company that advises clients on more than $\$ 10$ billion of investment assets and more than $\$ 12$ billion of total wealth. Founded in 2002, St. Louis Trust \& Family Office provides holistic, high-touch client service including customized, independent investment management and a full range of family office and fiduciary services. The firm serves a limited number of clients with substantial wealth in order to maintain very low client-to-employee ratios. Visit stlouistrust.com to explore how the firm manages complexity with unmatched expertise and focuses on Family, Always.
